Tectyl[®]

PROTECTIVE PRODUCTS

NEW!

**Environmentally
friendly, anti-corrosion and
sound damping products!**

Valvoline[®]

Tectyl is a brand name of Valvoline, one of the major independent international global oil companies, active in more than 100 countries around the world. Valvoline produces a comprehensive range of TECTYL rust-preventing products and lubricants for industrial applications and the automobile industry.

Market research, product development and extensive quality checks guarantee high-quality products and ultra performance. We have the right TECTYL product for virtually every application, ranging from thin clearcoats, heavy-duty wax-like products to black bituminous products. Offering customer-friendly solutions is the key to our success!

Valvoline's TECTYL products - designed for short-term or long-term protection for both indoor and outdoor use - help protect metal surfaces from the damaging effects of moisture, chloride and stubborn corrosion. The combination of these attributes has resulted in a broad range of TECTYL products that offer multifunctional performance.

New demands in the market are water-based and solvent-free products. These are an option when environmental, health or safety regulations prevent the use of products containing solvents. V-DAMP and TECTYL is a high performance solution for reduction and elimination of the structure-borne noise and vibration problems experienced in different fabrications. Sound damping products consist of various viscoelastic, sprayable liquid silencers, suitable for many industries where the vibrating resonance of metals must be reduced.

Tectyl 3217 Engine Protective

For engine protection

- Water based material
- Fast drying
- No discoloring when heated
- Transparent

Tectyl 5750 W Underbody Coating

The best under body coating

- 100% water based
- Extremely fast drying time
- High film building in one application
- Excellent protection against stone chipping
- Excellent flexibility
- Thixotropic

Tectyl 5638 W Sound Damper

The environmental friendly sound damper

- 100% water based
- Quick drying time
- Excellent adhesion on different substrates
- High film building in one application
- Reduces vibrations

Tectyl 4D750 Cavity Wax

For excellent protection of cavities

- Solvent free
- Non-dripping
- Excellent penetration
- Temperature resistant

V-Damp 3680

Water based Sound damper

- 100% water based
- Excellent adhesion on different substrates
- High film building in one application
- Reduces vibrations
- Fire resistant
- Forced drying capable
